

FITSUM MULUGETA

Full-Stack Developer · Laravel & React Specialist

✉ fitsummulugeta22@gmail.com · ☎ +251 939 581 537 · 📍 Addis Ababa, Ethiopia · GitHub: github.com/Fitsum-M

PROFESSIONAL PROFILE

Results-driven Full-Stack Developer with 2+ years of hands-on experience building and deploying production-grade enterprise web applications. Currently working remotely at Excelloite (India), where I have contributed to three live client systems serving real users — a background verification management platform, a non-profit donor CRM, and a multi-company agricultural ERP. I specialize in Laravel backend architecture, RESTful API design, React frontend development, and Linux-based cloud deployments. Passionate about writing clean, maintainable code and delivering software that solves real business problems.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Excelloite — India (Remote from Addis Ababa) | 2025 – Present

- Developed and maintained three production enterprise systems used by real clients across India and Ethiopia
- Built invoice generation, credit note reporting, and RFQ email modules with CC/BCC fields and dynamic mailer switching between Azure Graph API and SMTP fallback
- Implemented donor management features, KYC document uploads, campaign scheduling, and email template system for a non-profit CRM
- Worked on multi-company agricultural trade lifecycle flows covering domestic/export trade, inventory, finance, and compliance modules
- Implemented dynamic role and permissions system with per-module View/Add/Edit/Delete matrix and self-data-only access controls
- Deployed systems on Hostinger with Linux server setup, DNS configuration, database migrations, and production debugging
- Configured Azure OpenAI integration and resolved VNet firewall restrictions for API access in production

Independent Developer & Learner — Freelance & Self-Study | 2024–2025

- Solved 100+ algorithmic problems on LeetCode — built strong foundation in data structures and problem-solving
- Developed websites for small local businesses and organizations as freelance projects
- Self-studied Laravel, PHP, MySQL, JavaScript, and React through official documentation and personal projects

KEY PROJECTS

BVSM — Broker & Background Verification Management System [Laravel, PHP, MySQL, Blade, Tailwind CSS, Azure, Hostinger]

- Enterprise platform for broker management, background verification workflows, and candidate tracking used by financial sector clients
- Built invoice generation, credit note module, and RFQ email system with CC/BCC support
- Integrated Azure OpenAI and implemented dynamic mailer config stored in database (not .env) for flexible email provider switching
- Built full role & permissions matrix — per-module access control with View/Add/Edit/Delete and self-data-only toggle

Anekaa Care Foundation CRM — Donor & Fundraiser Management [[Laravel](#), [PHP](#), [MySQL](#), [Blade](#), [Tailwind](#), [Hostinger](#) | [Live: dms.aneakaacarefoundation.org](#)]

- Comprehensive CRM for a non-profit foundation to manage donors, fundraisers, campaigns, and communications
- Built donor registration, KYC document upload, campaign scheduling, and automated email notifications
- Configured MSG91 SMTP for production email delivery; deployed on Hostinger with full DNS and server setup

Adarsh Agritech ERP — Multi-Company Agricultural Trade Platform [[Laravel](#), [PHP](#), [MySQL](#), [REST APIs](#)]

- Multi-company ERP for managing domestic and export agricultural trade from order to delivery
- Worked on trade lifecycle management, inventory tracking, finance module, and inter-module workflow dependencies

TECHNICAL SKILLS

Backend: Laravel, PHP, Node.js, REST APIs, MySQL, PostgreSQL , Java

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

DevOps & Tools: Git, GitHub, Linux, Hostinger, Azure Cloud, Vite, REST APIs
